List of Contents

NUMBER 1

Variable structure slewing control and vibration damping of flexible spacecraft
Ashok Iyer and Sahjendra N. Singh 1

The Hermes system: programme status and technology aspects
M. Delahais and M. Nerault 11

Assessment of crew operations during internal servicing of the Columbus Free-Flyer by Hermes
F. Winisdoerffer, A. Lamothe and J. C. Bourdeau'hui 23

A new radar system for the French program in the 2000s
J. P. Aguttes, D. Massonnet and O. Grosjean 43

Telecommunications technology development for the Deep Space Network
J. H. Yuen, G. M. Resch and C. T. Stelzried 51

NUMBER 2

Stability of a tethered satellite subjected to stochastic forces
Guido de Matteis and Luciano M. de Socio 61

A closed-form dynamical analysis of an orbiting flexible manipulator
J. K. Chan and V. J. Modi 67

A novel autonomous orbit determination system using Earth sensors (scanner)
N. Nagarajan, M. Seetharama Bhat and K. Kasturirangan 77

Safety in the geostationary orbit after 1988
Luboš Perek 85

SPOT HRVIR: a significant improvement of high resolution visible SPOT camera to i.r. wavelengths
J. Jouan, J. F. Reulet and G. Costes 89

Compressibility effects during crystal growth from the vapour phase
C. Mignon and B. Zappoli 97

NASA spinoffs to bioengineering and medicine
Doris J. Rouse, Daniel L. Winfield and S. Catherine Canada 103

Effect of fluid and salt supplements in preventing the development of "osteopenia" in hypokinetic rats
Y. G. Zorbas, Y. F. Federenko and M. N. Togawa 111

EX MUNDO ASTRONAUTICO
List of Reviewers 117

AA 25/12—G

NUMBER 3

An explicit closed-loop guidance for launch vehicles
R. Vijaya Vittal and M. Seetharama Bhat 119

Real solutions for the attitude motion of a self-excited rigid body
James Michael Longuski 131

Optimal large angle maneuvers of a flexible spacecraft
Peter M. Bainum and Feiyue Li 141

Dynamics of the Space Station based mobile flexible manipulator
V. J. Modi and J. K. Chan 149

Simulation of solar array slewing of Indian Remote Sensing Satellite
P. K. Maharana and P. S. Goel 157

A view toward future launch vehicles: a civil perspective
C. R. Darwin, G. Austin, L. Varnado and G. Eudy 165

NUMBER 4

Three-dimensional LEO keeping using low-thrust
Jeng-Shing Chern, Ching-Yew Yang and Chung-Chen Lai 177

Design of attitude control system for injection of spinned payloads
S. Chavy and F. Fantar 185

Advances in space robotics
Giulio Varsi 199

Numerisches Charakteristikenverfahren zur Berechnung der Explosion
Peter Wehle und Walter Gretler 209

Radiatively cooled telescopes: a new direction for infrared space astronomy
J. K. Davies, T. G. Hawarden and C. M. Mountain 223

Satellite eclipse power by laser illumination
Geoffrey A. Landis 229

The provision of efficiency of the liquid metal evaporators in the space solar energy convertors
V. F. Prisnyakov, Yu. D. Morozov, A. N. Privalov, Yu. K. Gontarev and S. A. Belogurov 235

The basic health care system for the lunar base crew
Minoru Terai and Keiji Nitta 239

Germination and growth of wheat in simulated Martian atmospheres
Steven H. Schwartzkopf and Rocco L. Mancinelli 245

NUMBER 5/6

SPECIAL ISSUE

LAUNCH SYSTEMS

A selection of papers presented at the
40th Congress of the International Astronautical Federation
Malaga, Spain, 7–13 October 1989

Foreword
Malcolm G. Wolfe 249

Development status of Japan's new launch vehicle: H-II rocket
M. Miyazawa and Y. Fukushima 251

The Delta II launch vehicle
J. F. Meyers 265

Continued enhancements to the Commercial Atlas Launch System
Barry A. Matsumori and Greg Wong 273

This is Commercial Titan Inc.
F. L. Van Rensselaer, R. D. Slovikoski and T. C. Abels 291

The case for the evolution of the Shuttle system
Aaron Cohen 301

Ariane 5: a mature development programme
C. Johnson and J. F. Lieberherr 309

United States Orbital Transfer Vehicle programs
Charles R. Gunn 323

IRIS system and future application to expendable launchers
Luigi Bussolino, Franco Varesio, Giovanni Rum and Claudio Portelli 331

The Advanced Launch System: application of Total Quality Management principles to low-cost space transportation system development
M. G. Wolfe, T. G. Rothwell, D. A. Rosenberg and M. B. Oliver 339

NUMBER 7

Japanese first double lunar swingby mission "Hiten"
K. Uesugi, H. Matsuo, J. Kawaguchi and T. Hayashi 347

Experimental observation of the influence of furnace temperature profile on convection and segregation in the vertical Bridgman crystal growth technique
G. T. Neugebauer and W. R. Wilcox 357

Hypervelocity impact response of aluminum multi-wall structures
William P. Schonberg and Alan J. Bean 363

French "platform-related" technological experiments on-board Soviet Space Stations
J. J. Runavot 375

Remote sensing of mesospheric and thermospheric density perturbations induced by subtropical heavy rainfalls for spacecraft environment study
R. J. Hung, C. C. Lee, D. L. Johnson and A. J. Chen 379

The aimed satellite scanner imagery: results and progress
N. V. Mezhelovsky Y., O. L. Kuznetsov, N. S. Ramm, A. K. Rynskaya, A. S. Selivanov, Ju. V. Trifonov, A. M. Volkov, V. V. Shvarjov and L. P. Yaroslavsky 395

Navstar GPS and GLONASS: global satellite navigation systems
P. Daly 399

ETS-VI Multibeam Satellite Communications Systems
Makoto Kawai, Masayoshi Tanaka and Isao Ohtomo 407

Effect on the cardiac function of repeated LBNP during a 1-month head down tilt
Ph. Arbeille, D. Lebouard, M. Massabuau, J. M. Pottier, F. Patat, L. Pourcelot and A. Guell 415

NUMBER 8/9

SPECIAL ISSUE

SPACE FOR PEACE AND PROGRESS

Selected papers presented at the
41st Congress of the International Astronautical Federation
Dresden, Fed. Rep. Germany, 8–12 October 1990

Data handling in telescience experiments using the Prototype Optical Diagnostic Instrument (PODI)
E. A. Kuijpers and R. Born 419

Unmanned servicing of Earth observation systems in sunsynchronous orbits
Jack Sliney, Bill Robertson, Tom Misencik and Jeannie Lee 429

Use of NOAA satellite data for grassland studies in Poland
Zbigniew Bochenek 439

Spectral characteristics of mixed classes of natural formations
Dimitar Mishev 443

Earth–Mars unmanned transportation systems
Chun Dong and Zuwei Huang 447

Optimization of a Cassegrainian collector/receiver system for solar-dynamic space power generation
W. Zörner, W. Sedlmair and J. Blumenberg 449

Optimal control of ascent trajectories and rotary dynamics for wingless orbital stages
Gottfried Sachs, Johannes Drexler and Robert Stich 463

An approach to system modes and dynamics of the evolving Space Station Freedom
V. J. Modi, A. Ng and A. Suleman 473

On-orbit control system performance of the ROSAT spacecraft
M. Bollner 487

DORIS (Doppler orbitography and radiopositioning integrated from space): system assessment results with DORIS on SPOT 2
M. Dorrer, B. Laborde and P. Deschamps 497

Ground-based experiments and theory in preparation for floating zone melting and directional solidification of cadmium telluride in space
W. R. Wilcox, F. M. Carlson, D. K. Aidun, V. White, W. Rosch, W. M. Chang, R. Shetty, A. Fritz, R. Balasubramanian, G. Rosen, J. Kweeder and C. Wen 505

Response of a solid–gas solidification interface to bulk heat sources
Bernard Zappoli 511

Slosh wave excitation in a partially filled rotating tank due to gravity jitters in a microgravity environment
R. J. Hung, C. C. Lee and F. W. Leslie 523

Numerical simulation of controlled directional solidification under microgravity conditions
S. Holl, D. Roos and J. Wein 553

Hipparcos on-orbit environment and performance
G. Fade, M. le Moine and D. Pawlak 561

Slant path rain attenuation distribution at frequencies above 10 GHz: correlation between some propagation models and results of long-term measurements in the Intercosmos Programme
E. Alexandrova, W. Bauer, W. Liebsch, H. Trommer, V. Bykov, V. Svjatogor, O. Fisher and A. Kavetzki 579

Changes in chromatin and nucleic acids in rat tissues after two-week spaceflight
E. Mišúrová and K. Kropáčová 587

Unmanned *in situ* experiment on lunar resources
Tsutomu Iwata and Hideo Ohuchi 591

Lunar base initiative 1992
H. H. Koelle 595

Analogy between training for dancers and problems of adjustment to microgravity: an evaluation of the subjective vertical in dancers
Kitsou Dubois 605

NUMBER 10

Analysis of a solarthermal transfer propulsion system
A. Daum and J. P. Schleinitz 615

Mixed convection and solidification in a simplified metal pool of an ESR system
Chun-Liang Lai and Kuo-Chang Chiou 625

Telescience benefits and challenges in the early Space Station Freedom era
E. L. Saenger, G. M. Delaney and G. W. Maybee 641

Various problems in lunar habitat construction scenarios
Keiji Nitta, Koji Ohtsubo, Mitsuo Oguchi, Haruhiko Ohya, Seiichiro Kanbe, Akira Ashida and Kenichi Sano 647

ACADEMY TRANSACTIONS NOTES
Investigation of thermoconvective motion of liquid in enclosure by photochromic flow visualization
Yu. S. Ryazantsev and V. N. Yurechko 659

Lunar He_3 for fusion energy on Earth?
Harry O. Ruppe 665

SPS revisited
Harry O. Ruppe 667

NUMBER 11

Automated trajectory synthesis for hypersonic vehicles using energy management and variational calculus techniques
N. Venugopal, R. V. Grandhi, W. L. Hankey and P. J. Belcher 669

Modeling and analysis of orbiting tethers in an atmosphere
Jordi Puig-Suari and James Michael Longuski 679

Control issues of microgravity vibration isolation
C. R. Knospe, R. D. Hampton and P. E. Allaire 687

Axial response of an amphora-type liquid column
H. F. Bauer and W. Eidel 699

Space-based cryogenic liquid hydrogen reorientation activated by low frequency impulsive reverse thruster of geyser initiation
R. J. Hung and K. L. Shyu 709

French Processing and Archiving Facility for ERS-1
M. Duplaa, P. Farcy and C. Billard 721

Effect of hyperhydration on bone mineralization in physically healthy subjects after prolonged restriction of motor activity
Yan G. Zorbas, Youri F. Federenko and Konstantin A. Naexu 727

Astronautics and psychology: recommendations for the psychological training of astronauts
Gerhard F. Haupt 733

NUMBER 12

Editorial 737

Particle agglomeration and fuel decomposition in burning slurry droplets
P. Roy Choudhury and Melvin Gerstein 739

Hypersonic flows over slender circular cones at small angles of attack
Hamdi T. Hemdan 747

Thermal resistance in satellite mounting plates due to conductive heat transfer
Nellore S. Venkataraman and Daniel G. Sepulveda 757

Space experiments of Deployable Boom and Umbrella Test satellite (DEBUT)
A. Nakajima, M. Abe, Y. Nishio and H. Yahagi 765

CROCODILE: an automated apparatus for organic crystal growth from solution
F. Gonzalez, M. Cunisse and A. Perigaud 775

A strategy to study regional hydrology and terrestrial ecosystem processes using satellite remote sensing, ground-based data and computer modeling
C. Vörösmarty, A. Grace, B. Moore, B. Choudhury and C. J. Willmott 785

An innovative approach for distributed and integrated resources planning for the Space Station Freedom
Rhoda Shaller Hornstein, Gerald L. Shinkle, Jerry D. Weiler and John K. Willoughby 793

Public school teachers in the U.S. evaluate the educational impact of student space experiments launched by expendable vehicles, aboard Skylab, and aboard Space Shuttle
Bettye B. Burkhalter, James E. McLean, James P. Curtis and George S. James 799
